DETAILED ACTION

- 1. This communication is in response to Applicants' Amendment to Office Action dated January 30, 2004, mailed June 1, 2004, received by PTO June 3, 2004, and Applicants' Supplemental Amendment faxed September 3, 2004.
- 1-1. Claims 1, 8, 11, and 12 have been amended. Claims 4, 7, 13-15, and 17-23 have been cancelled. Claims 1-3, 5, and 8-12 are pending.
- 1-2. Claims 1-3, 5, and 8-12 have been examined and allowed.

Interview Summary

2. On September 2, 2004, the Examiner telephoned Mr. Jon C. Reali (Reg. No.: 54,391) to discuss potential allowable subject matter. In response to the telephone conversation, Applicants submitted the Supplemental Amendment on September 3, 2004.

Reasons for Allowance

- 3. The following is an Examiner's statement of reasons for allowance:
- **3-1.** The closest prior art of record discloses:
- (1) A hardware/software co-simulation in a VHDL-based Test Bench Approach (Bauer et al., "Hardware/Software Co-Simulation in a VHDL-based Test Bench Approach", June 1997);
- (2) A co-verification extension module to permit the user to connect to real external data streams (Hollander, U.S. Patent 6,182,258).

Application/Control Number: 09/495,150

Art Unit: 2128

- 3-2. Independent claim 1 is directed at a method of developing an ASIC as shown in Figure 1. This independent claim identifies the distinct combination of features of "developing a hardware model including a CPU bus functional model, and a software loaded on a CPU server concurrently" and "communicating command and control information between the CPU server and the CPU bus functional model over a network according to an XBUS protocol modified to exchange data for all modules using the XBUS protocol by sharing a plurality of registers and without using a physical bus" as described in the third paragraph, page 11 of the specification and argued at page 7 of the Supplemental Amendment faxed September 3, 2004. The closest prior art does not teach or reasonably suggest using the modified XBUS protocol for cosimulation in developing an ASIC. Claim 1 and its dependent claims 2, 3, and 5 are deemed allowable.
- 3-3. Independent claim 8 is directed at a method of co-simulating a hardware model and a software in ASIC development as shown in Figure 5. This independent claim identifies the distinct combination of features of "Requesting, by a hardware side including a hardware model and a CPU bus functional model, access to a software side including a software loaded on CPU server over a network according to a modified XBUS protocol to exchange data for all modules using the XBUS protocol by sharing a plurality of registers and without using a physical bus" and "sending an access request from the CPU bus functional model to the CPU server over the network according to the modified XBUS protocol" as described in the third paragraph, page 11 of the specification and argued at page 7 of the Supplemental Amendment faxed September 3, 2004. The closest prior art does not teach or reasonably suggest using the modified XBUS

Page 4

protocol for co-simulation a hardware model and a software in ASIC development. Claim 8 and its dependent claims 9-11 are deemed allowable.

3-4. Independent claim 12 is directed at an apparatus for hardware model and software co-

simulation in ASIC development as shown in Figure 1. This independent apparatus claim has

the equivalent limitations as the method claim 1. The closest prior art does not teach or

reasonably suggest using the modified XBUS protocol for co-simulation in ASIC development.

Claim 12 is deemed allowable.

Examiner can normally be reached on 9:00 - 17:30.

4. Any comments considered necessary by applicant must be submitted no later than the

payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Allowance."

Conclusion

5. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Herng-der Day whose telephone number is (703) 305-5269. The

If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's supervisor, Jean Homere can be reached on (703) 308-6647. The fax phone numbers for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-3900.
